PLAN AHEAD WITH CONFIDENCE

Why register early?

Securing your place early is the best way to plan ahead for ISCoS 2026. It gives delegates time to organise budgets, approvals, travel, accommodation, and attendance well in advance, while taking advantage of the super early bird period.

Best available rate

Secure the super early bird rate while it is currently available and confirm your participation before the next fee stage.

Plan with confidence

Booking early makes it easier to arrange internal approvals, travel planning, accommodation, and diary commitments in good time.

Join a global meeting

Be part of an important international meeting bringing together the spinal cord injury community across research, rehabilitation, clinical science, and innovation.

SCIENTIFIC VALUE

A Meeting Shaped by International Expertise

ISCoS 2026 will bring together an international and multidisciplinary community committed to advancing spinal cord injury care, research, rehabilitation, and innovation. The Meeting offers an important platform for scientific exchange, collaboration, and shared progress across the field.

Further scientific announcements will follow in due course. In the meantime, delegates can already secure their place and begin planning for Kuala Lumpur this October.

DISTINGUISHED KEYNOTE LECTURES

Internationally Respected Voices at ISCoS 2026

ISCoS 2026 will feature a keynote programme shaped by internationally respected voices across spinal cord injury research, rehabilitation, clinical science, and innovation. These distinguished lectures reflect the depth, authority, and global reach of the Meeting.

Featured keynote lectures

Among the distinguished lectures confirmed for ISCoS 2026 are:

Professor James Krause — The Guttman Lecture

Professor Claes Hultling — The ISCoS Lecture

Professor Abdulghani Sankari — The Anthony F. DiMarco Lectureship

Associate Professor Apichana Kovindha — The ASCoN Lecture

Dr. Michael Kilgard — The Wings for Life Lecture

Explore the full speaker line-up, lecture summaries, and biographies to see how the scientific programme is taking shape.
